

LNG / LP SAFETY AND EMERGENCY RESPONSE TRAINING PROGRAM

The Most Comprehensive LNG Safety and Emergency Response Training Program in the Industry

The Northeast Gas Association, in partnership with the Massachusetts Firefighting Academy, offers the most comprehensive LNG/LP safety and emergency response training program in the country, combining classroom instruction and hands-on training.

Read what past participants have to say about the program:

"We sent 15 employees and five local volunteer firefighters to the LNG Training School in Stow, MA this year. Everyone who attended raved about the wonderful facility and the quality of instruction provided. I'm looking forward to continuing and even expanding our relationship in the future. Time spent at the Massachusetts Firefighting Academy is time well spent." Terry L. Cox, Dominion Cove Point

"...because of the unique learning experience the School provides, we've sent employees from as far away as Chile for training at the Academy." Frank Katulak, President, Distrigas GDF Suez

LNG / LP SAFETY AND EMERGENCY RESPONSE TRAINING PROGRAM

THE PROGRAM *The curriculum has been designed to address the requirements set for in the Department of Transportation regulations pertaining to LNG emergency training. The Program is recognized throughout the globe and has been attended by over 2,500 individuals from the United States and other countries e.g. Chile, Trinidad and Tobago, Qatar, Singapore and Mexico. The relationship originated in the 1970's and was developed based on a common need to provide information and training involving natural gas, liquid natural gas (LNG) and propane. This unique public/private sector relationship has resulted in the development and operation of the LNG Safety and Emergency Response Training Program.*

◇ **Classes are limited to 30 students.**

◇ **Certificates are awarded to those successfully completing the full program**

Day One—Classroom Instruction

- Basic characteristics of natural gas, LNG and propane
- Essential information re: multi-agency operations, nims/ics, nature of fire, LNG in storage and transportation, LNG/LPG chemical properties and examples of actual incidents
- In-depth discussion of practical scenarios

9:00 AM—4:00 PM

Day Two—Hands-On Training

- Students fitted into full firefighting gear and experience LNG Emergency situations first hand
- Interactions learned in the classroom are experienced in the field through a series of props

8:00 AM—4:00 PM

FACULTY Norm Seymour is the Coordinator of the Flammable Gas Office at the Massachusetts Firefighting Academy. Norm has been with the MFA for 17+ years and an active fireman for 23 years. In addition to Norm, 8-12 (depending on class size) fire personnel with similar qualifications, assist with the training.
