

ABOUT US

The focus of Fuss & O'Neill Energy Alternatives is natural gas as the primary fuel of choice complemented by renewable energy sources such as anaerobic digester gas, landfill gas, wind, geothermal and solar.

ABOUT THE POSITION

The expanding Energy Alternatives, LLC is seeking a degreed **Engineer III** for its operations located in its Bedford, NH office.

Candidate will be responsible for producing high quality process/mechanical engineering design deliverables (with the assistance of design and/or drafting personnel). Primary focus of position will involve detailed design drawings and specifications. Additionally some construction support, feasibility studies, and support of design/build issues will be required.

Position Requirements:

- BS in Chemical or Mechanical Engineering required with an EIT required.
- 6-12 years of natural gas experience
- Piping Design Experience required
- Prior work experience with natural gas Local Distribution Companies (LDCs) and/or transmission line companies is required.
- PE registration is preferred.
- Proficiency with AutoCAD
