

# Annual Gas Production, NY

**NEW YORK STATE, ANNUAL GAS PRODUCTION, Bcf**

*Sources: NYSERDA; NYS DEC*

**GAS AND OIL WELL LOCATIONS, NEW YORK**

The first gas production in the U.S. was in New York State. Production represents the equivalent of about 5% of the state's annual needs, and well development continues to grow, with new focus on potential shale gas development in the Appalachian Basin. There is no gas production in New England or New Jersey.
